

## WiC® for Computer: Let's get started

### **For Windows PCs:**

1. Plug the WiC® USB stick into an available USB port.
2. Once Windows has detected the USB device, navigate to Sounds through Control Panel and then select the recording tab.
3. Select the WiC® device listed as your default recording option, and make sure it is enabled.
4. Plug the WiC® Transmitter into your guitar.
5. Turn on the WiC® Transmitter. Flashing blue means you need to pair the devices. Press the pairing button on both devices (you have 10 seconds). The blue lights will turn solid when they are paired.
6. Open your software and begin recording.

### **For Macs:**

1. Plug the WiC® USB stick into an available USB port.
2. Navigate to Sounds and look for the WiC® product.
3. Select the WiC® so it is available to installed software such as Garage Band.
4. Plug the WiC® Transmitter into your guitar.
5. Turn on the WiC® Transmitter. Flashing blue means you need to pair the devices. Press the pairing button on both devices (you have 10 seconds). The blue lights will turn solid when they are paired.
6. Navigate to your software and begin recording.

## What's Included:

- 1 – WiC® Transmitter
- 1 – WiC® USB Receiver
- 1 – Dual USB charger
- 1 – USB charging cable
- 1 – ¼" audio cable
- 1 – Holster for the WiC® Transmitter

## Tips & Hints:

- **Charging:** The Dual USB Charger will charge the WiC® transmitter from zero to full charge in about 2½ hours. The charge will give you up to 8 hours of use. WiC® units charge fast and 15-30 minutes of charge gets you lots of playing time.
- **Range:** We suggest staying within 20 feet of your Mac or PC, but experiment to find out how far you can go. WiC® automatically finds the most interference-free channel, but for best results keep the WiC® away from electronics like your phone or other electronics that may cause interference.
- **Power Saving Mode:** If you are not playing, WiC® Transmitter will go into sleep mode to save power. It wakes up the moment you start playing.
- **Audacity** is a good freeware option for Windows and is quick and easy for fast demonstrations.

## **WARNING:**

- No user serviceable parts inside.
- Each unit is powered by Lithium-Ion Rechargeable Battery.
- Do not open, crush, modify, disassemble, heat above 140°F (60°C), or incinerate.
- Improper handling could cause batteries to explode or release toxic materials, creating risk of fire or burns.
